

Requirement Services

Acquire the quality and standards of a team who does requirements gathering for Microsoft, scale up your business while providing quality support at lower costs

"I would like to congratulate the Dynamics team at SAGlobal on the completion of the functional specifications for Axapta Localization. This is really a commendable achievement considering the fact that 34 specifications covering 6 major Indian taxes were done.

I am confident that this quality of work generated by the team, will result to be the turning point for Axapta Localization and help it gain a far greater share in the Indian market place.

All the very best for Microsoft Dynamics AX5.0 Features, GLS merge and Wave 2 Projects . I am positive that we will together challenge the "Challenge" and enhance the value of India localization substantially."

Prabhat Bhargava
Program Manager
Global Development Localization
Microsoft Corporation India (Pvt.) Ltd.

Experience & Knowledge

We have an experienced team of Functional analysts who are adept at Requirements writing as per Microsoft standards on Microsoft Dynamics. We have undertaken the following:

- ✓ Extensive experience in the end-to-end process of functional specification designing – from Feature analysis and designing to Product presentation and training
- ✓ Expertise in Business process analysis, Requirement gathering and Use case modeling
- ✓ Excellent product designing and functional specification documentation skills
- ✓ Specialized and in-depth knowledge base on the business and legal requirements

The SAGlobal Partner AdvantEDGE Program

The SAGlobal Partner AdvantEDGE program provides Microsoft partners with an opportunity to expand their business and reduce their bottom-line.

Having provided services to Microsoft for about a decade on both core development and support, the SAGlobal Partner AdvantEDGE program gives you the capability to provide the quality and support standards similar to Microsoft.

You can utilize our resources and extensive experience in the end-to-end process of functional specification designing - from feature analysis and designing to product presentations and training.

This is the perfect way for you as a Microsoft partner to focus on new business development while we take care of your business operations for you.
